## A Bright Idea from the West Shore Chamber

In less than two months businesses will see a significant increase in their PPL electric bills. **The Chamber with partner OnDemand Energy Solutions** can help participating members pool together their purchasing power to save money on their commercial electric bills.

### Benefits:

- ✓ Members will be able to lock in electricity prices that will be lower than the prices they will receive through PPL.
- ✓ Small businesses in this program will have the same purchasing advantage of large corporations that are able to negotiate their electric rates directly with electricity suppliers.
- ✓ OnDemand Energy Solutions individually analyzes each applicant. If the analysis shows that the applicant will not save money, OnDemand will contact the applicant with other options.
- ✓ OnDemand Energy Solutions will be available for ongoing customer service to answer questions and help participating members with any concerns about their billing or electricity usage.

### How to apply:

- ✓ Members submit an application to OnDemand Energy Solutions.
- ✓ OnDemand will go out to bid and obtain the best price for electricity.
- ✓ Once the bid is finalized, members will receive a contract and have five days to return the contract to OnDemand.
- ✓ Every time one pool closes, another pool is opened so there is no direct deadline to apply.

### About OnDemand:

- ✓ Founded in 1995 in Pittsburgh, PA
- ✓ Comprised of energy experts
- ✓ Manage Electricity requirements for more than 500 clients
- ✓ Licensed by the PUC
- ✓ Serve wide range of businesses
- ✓ Not affiliated with an energy supplier or company
